

Purchases Module

Overview: The Merchant Purchase Module enables users to perform purchases via the mobile application, facilitating efficient transactions for farmers who sell their products. This module requires a three-user workflow to ensure accuracy and security.

User Roles and Responsibilities

1. **Initiator (Agent).** The Initiator is responsible for initiating transactions by recording farmer purchases in the system.
2. **Reviewer.** The Reviewer verifies and reviews the initiated transactions for accuracy and completeness, then forwards them for approval.
3. **Approver.** The Approver reviews and approves the transactions. Once approved, the system disburses mobile money payments to the farmers' phones.

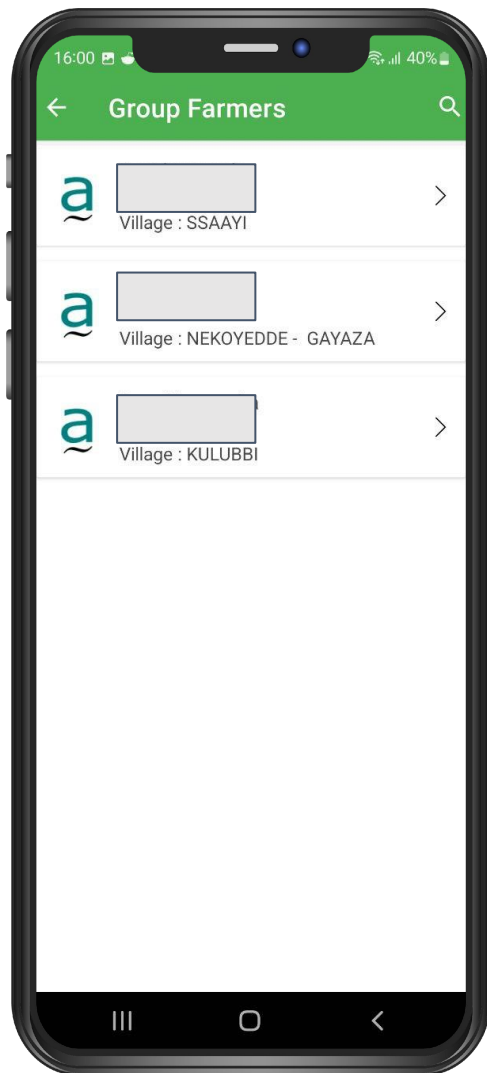

Initiating Transactions

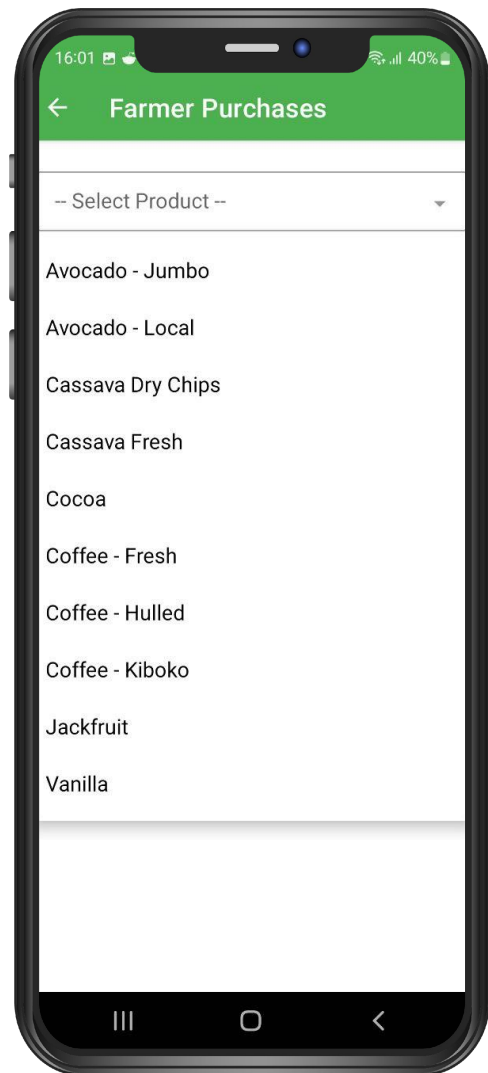

The Initiator is responsible for recording farmer purchases in the system. To initiate a transaction:

1. Log in to the mobile application with credentials shares by MobiPay team
2. Select the " Purchase" module.
3. Select Farmer Group you will purchase from
4. Select the Farmer to purchase from
5. Add as many commodities as required before going to the next farmer (if needed)
- 6.Upload the newly recorded purchases

select Group

Then select Farmer

select Commodity

And fill in the form
Accordingly

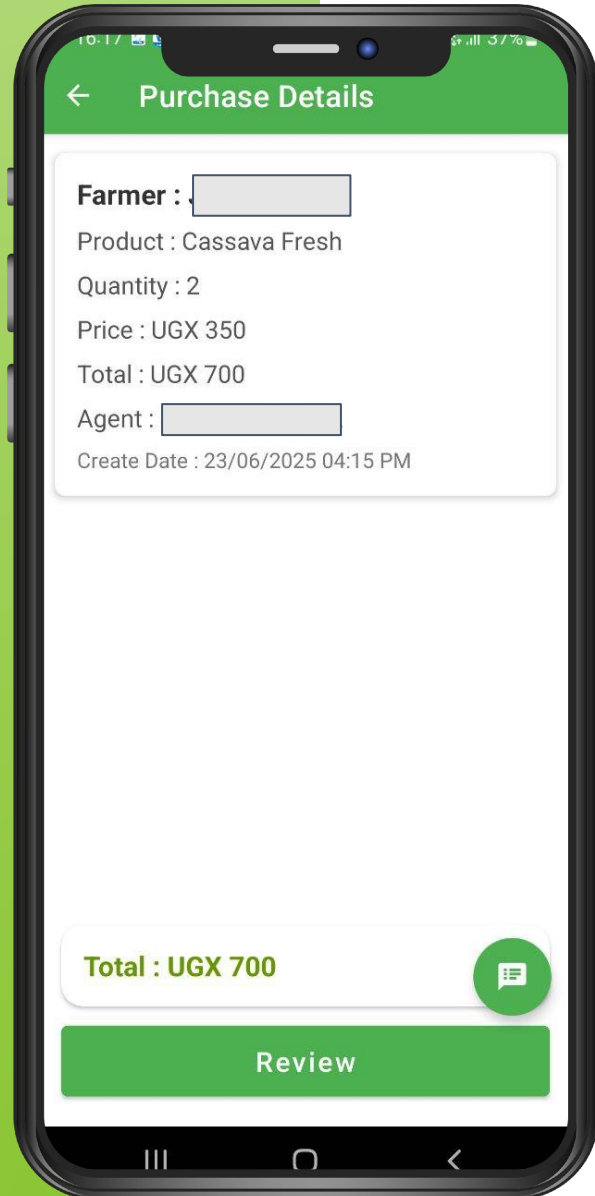

Save Purchases

Select pencil icon to add

Upload Purchases

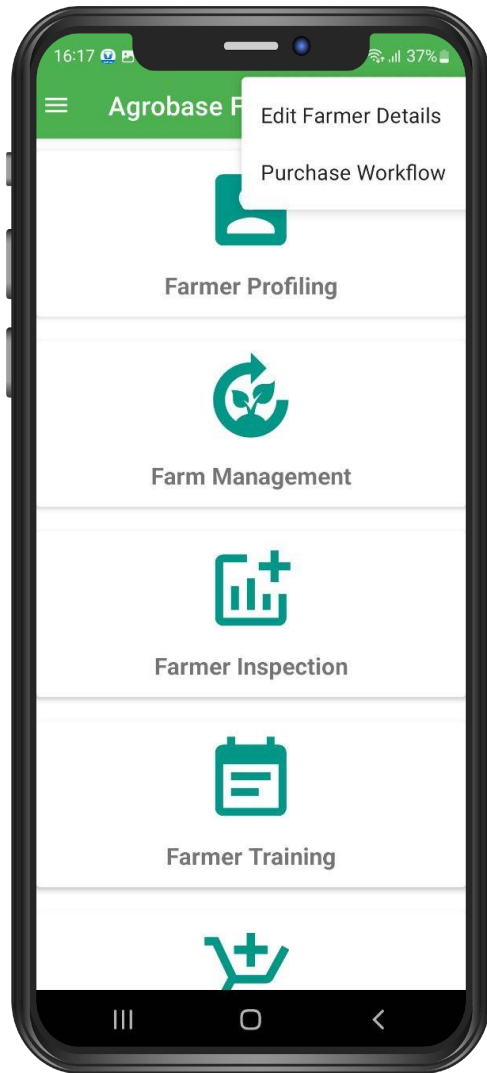

click the upload
button to submit data

Reviewing Transactions

The Reviewer verifies and reviews the initiated transactions for accuracy and completeness. To review a transaction:

1. Log in to the mobile application.
2. Access the transaction queue.
3. Verify transaction details and forward for approval.

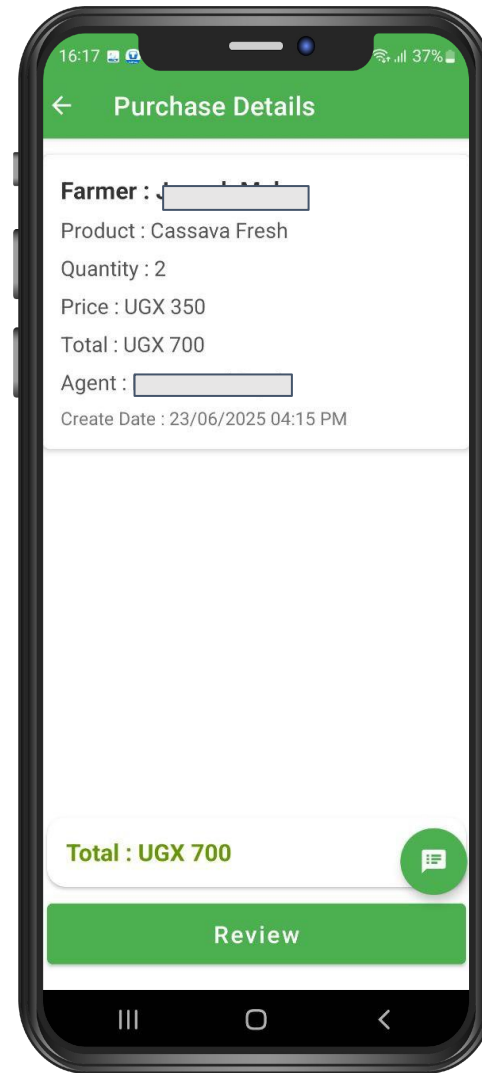

**select Purchase
WorkFlow**
