

eGwoko Frequently Asked Questions (FAQs)

1. Login & Registration Issues

Q1. When I dial the USSD or log in through the app, it says “Number not registered.”

This means you are either not yet registered in the system or you were registered using a different phone number.

Solution: Contact your group agent or support team to verify your registration details or update your phone number.

Q2. I can't log in via the app.

Possible causes include:

- Wrong phone number or PIN
- Your group has not been linked to a payments account
- You have not been profiled as a member

Solution: Verify your login credentials and confirm that your agent has profiled you correctly and linked your group to an active payments account.

Q3. I forgot my PIN or password.

Contact your group agent or support team to reset your PIN. A temporary one will be sent to your registered phone number.

Q4. The USSD/app keeps saying “session expired” or “network error.”

This can be caused by:

- Poor mobile network connection
- Long inactivity during the session

Solution: Try again in an area with better network signal and complete the process within a single session.

2. Savings & Transactions

Q5. When I try to save, it shows “0.00” as the price of a share.

This means your group's **share price** has not been configured.

Solution: Ask your group chairperson or agent to ensure the “Share Capital Price per Share” is entered in the system under *VSLA Settings*.

Q6. I successfully made a deposit, but the status still shows as “Failed” or “Pending.”

Sometimes payments delay in updating automatically.

Solution: The system performs **automatic reconciliation every 3 days**, which will correct your transaction status. If it remains unchanged after that, contact support for manual reconciliation.

Q7. I want to save, but I don’t have a registered phone number.

Another member can help you save using your **auto-generated Member ID**.

Solution: Share your Member ID with them, and they can complete the saving on your behalf.

Q8. I tried to make a payment, but I get a “network error” after confirming the last step.

If it’s not a genuine network problem, this usually means your group hasn’t been linked to a **payments account** in the Payments System.

Solution: Ask your agent or admin to confirm that your group is properly linked.

Q9. The app shows a different group name when I try to save.

You may have been profiled under the wrong group.

Solution: Contact your agent to reassign you to the correct group.

Q10. I want to withdraw my savings or transfer them to another member.

Currently, this process is manual.

Solution: Contact support with both the buyer’s and seller’s details, and the team will process the transfer.

3. Loans & Approvals

Q11. I requested for a loan, and it has been approved by admins, but I haven’t received the money.

Check the number of **keyholders/approvers** in your group. All must approve the loan before disbursement.

Solution: Ensure that all required keyholders (usually 3) have approved. If any reject, the loan will not be disbursed.

Q12. All keyholders have approved my loan, but I still haven’t received the funds.

Sometimes, automatic disbursement fails.

Solution: Contact your agent to escalate to the support team for **manual disbursement**.

4. Group-Level Issues

Q13. Our group wants to do a share-out.

Notify the support team before share-out.

Solution: The team will process disbursement of available balances and close the group cycle safely.

Q14. Our group transactions are not showing in reports.

This can occur if the group's VSLA configuration wasn't saved properly.

Solution: Ensure that the VSLA checkbox was selected and updated when the group was created.

5. Agent & Profiling Issues

Q15. I can't find my group or members in the app.

The group or members may not have been properly profiled.

Solution: Ask the agent to sync or re-profile the members, ensuring the correct group is selected.

Q16. I'm an agent and can't log into the profiling app.

Ensure you have received your login credentials via SMS and that your profile is active in the system. If not, contact the admin for reactivation.

Q17. I entered data in the profiling app but it's not showing in the web system.

This could be due to lack of internet connectivity during submission.

Solution: Reconnect to the internet and tap "Sync" on the app to resend pending records.

6. Payment System Issues

Q18. Payments are not reflecting in the VSLA system.

Verify that your payments account API details (Key, Username, Account ID) are entered correctly in the system under *Settings* → *Payment Account*.

Q19. Some transactions show duplicated or missing entries.

This can occur if the payment system times out.

Solution: Wait for reconciliation or contact support to trigger a manual sync.

Q20. I can't generate an API key or username.

Make sure you have admin rights in the Payments System. Only authorized users can generate API credentials.
